

Model 2010 Ionised Air Blowers are long distance static eliminators with a robust aluminium construction and powerful ionisation performance.

2010 Blowers produce a high volume of ionised air to neutralise static charges in a wide variety of industrial applications.

- > Robust aluminium construction for a long trouble-free life.
- > Ionisation is provided by two 1250 Bars, mounted in the "mouth" for fast, market-leading static neutralisation.
- > Sizes available - from 305 mm, 500 mm then up to 2 m in steps of 250 mm.
- > The ionised air leaves the blower and expands at approximately 15° in both axes.
- > Swivel L brackets allow for versatile mounting.

## Specification

<b>Length:</b>	Blower length 305 mm, 500 mm then up to 2000 mm in 250 mm steps.
<b>Cable:</b>	IEC connector and 2 m mains cable.
<b>Max. Temperature:</b>	60°C.
<b>Fans:</b>	One axial fan per 250mm. Rated at 50,000 hours. Flow rate: 5600 lit/min per fan/250 mm.
<b>Safety:</b>	100 MOhm resistance for shockless operation. Current limited to 5 mA.
<b>Power Unit:</b>	Integrated Power Unit.
<b>Speed Control:</b>	Manual adjustable fan speed control to suit application.
<b>Electrical:</b>	115 V or 230 V 50/60 Hz. Please specify. Consumption: 305 mm: 80 W 500 mm: 120 W Then + 40 W for each additional 250 mm.
<b>Static Eliminators:</b>	Removable from the front for ease of servicing.
<b>Options:</b>	Filters.
